

CAHOCON 2020

PRE CONFERENCE WORKSHOP

Quality tools Implementation in HAI Surveillance and Risk Management

Reducing and eliminating Healthcare Associated Infections (HAIs) requires a robust Infection prevention & control (IPC) Program based on well captured and analysed HAI surveillance data. This workshop will equip participants in choosing and effectively applying quality tools on captured IPC data, identify gaps in IPC practices, develop and execute an action plan, assess the impact of its implementation and guide sustenance & progress of quality improvement activities over time.

HIGHLIGHTS

- ✓ Infection Control Risk Assessment -ICRA
- ✓ Understanding benchmarking in IPC
- ✓ Hands-on experience in selection and implementation of quality Tools in IPC
- ✓ What's new in NABH 5th edition HIC standards
